Lam-Nguyen Nguyen

Nguyễn Lâm Nguyên

Undergraduate Researcher · Vinh Long University of Technology Education (VLUTE), Vietnam

Email: lamnguyen.it04@gmail.com · GitHub: github.com/lawnguyenit · Location: Vinh Long, Vietnam

EDUCATION

Vinh Long University of Technology Education **2022 – 2026**

B.S. Candidate in Information Technology, Cybersecurity Track

Expected Graduation: November 2026 · GPA: **3.21 / 4.00**
Member of the first student cohort following the university's Cybersecurity track.

RESEARCH INTERESTS

Trustworthy Machine Learning, Weak Supervision, Benchmark Validity, IoT Telemetry, Temporal Evaluation Protocols, Distribution Shift, Reliable Data Systems.

PUBLICATIONS & MANUSCRIPTS

Benchmarking Foundation Models and Gradient Boosting for Agricultural IoT Context Analytics: A Weakly Supervised Temporal Evaluation **2026**

Hoai-Hanh Tran, Thanh-Nghi Doan, ***Lam-Nguyen Nguyen***

Manuscript submitted to EAI AICON 2026.

Observation Contracts and Effective Evidence in Temporal Rule-Derived Agricultural IoT Targets **2026**

Lam-Nguyen Nguyen*, Hoai-Hanh Tran, Thanh-Nghi Doan*

First-author working manuscript (under internal review prior to submission).

RESEARCH EXPERIENCE

First-Author Research on Temporal IoT Target Validity **2026 – Present**

Developing observation contracts and effective evidence formulations for temporal rule-derived agricultural IoT targets, with controls for label construction, temporal history, matched anchors, and deployment transport.

Undergraduate Researcher, Agricultural IoT Analytics **2026**

Contributed to data cleaning, dataset organization, weak-label construction, model benchmarking, temporal evaluation, and result analysis for a co-authored conference manuscript submitted to EAI AICON 2026.

Undergraduate Thesis Researcher **2025 – 2026**

Advisor: Dr. Tran Hoai Hanh · Thesis Score: 8.9 / 10

Designed and deployed an ESP32-S3 telemetry system and built a traceable processing pipeline from raw field data to weakly labeled machine-learning benchmarks.

HONORS & AWARDS

Consolation Prize, Algebra Division B **2025**

National Student Mathematics Olympiad.

University Representative, National Student Mathematics Olympiad **4 Editions**

Selected to represent VLUTE in Algebra Division B across four editions.

TECHNICAL SKILLS

Programming & Data: Python, C/C++, Tabular Machine Learning, Temporal Evaluation Protocols, Data Cleaning.

Models & Methods: XGBoost, Logistic Regression, FT-Transformer, TabPFN, Weak Supervision, Imbalanced Data.

IoT & Embedded Systems: ESP32-S3, RS485/Modbus Sensors, SHT30, SIM A7682S (4G LTE), Firebase Realtime Database.

Research Tools: Git/GitHub, LaTeX, Linux, Technical Writing, Reproducible Experiment Pipelines.

ACADEMIC WRITING

Undergraduate Thesis **2026**

Building an IoT-based System for Monitoring Environmental and Nutritional Conditions in Durian Orchards.

Mathematical Exposition Note **2025**

From Determinants to Rank: An Approach to Parameterized Matrix Problems in Undergraduate Algebra Olympiads.

LANGUAGES

Vietnamese: Native.

English: Institutional B1 Equivalent Certificate (Vinh Long University of Technology Education).
